PROFESSIONAL SUMMARY

Full Stack Developer specializing in the MERN stack, with 6 years of dedicated hands-on building experience. Combines clean frontend architecture with a Google-certified UX foundation to design, develop, and deploy fully functional web applications, with additional exposure to PHP and Vue.js. Focused on writing scalable code and eager to contribute to an engineering team.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), HTML5, CSS3, PHP
Frameworks & Libs	React, Next.js 15, Node.js, Express, Vue.js, Tailwind CSS, i18next
Databases & Tools	MongoDB, Git, REST APIs, Figma, Firebase/Supabase, Render, Google Places API
UX/UI Design	Wireframing, Prototyping, User Research, Responsive Design, High-Fidelity Mockups

TECHNICAL PROJECTS & INDEPENDENT DEVELOPMENT

Hospedaje por Dias

- **Developed** a fully localized, responsive lodging platform in React supporting dynamic language switching.
- **Integrated** i18next to manage multi-language content, improving interface accessibility for international users.
- **Designed and engineered** an optimized, high-conversion "Book Now" workflow, reducing user booking steps.

Birdrock Surfshop

- **Architected** a dual-purpose e-commerce and rental application using React, Vite, Tailwind CSS, and Firebase.
- **Engineered** a real-time inventory management database to track store stock and live rental status (checked out, upcoming, and returned items).
- **Built** an administrative dashboard that centralizes inventory updates, reservation tracking, and client messaging.

Gym Finder Application

- **Created** a responsive administrative console in Next.js to manage user directories and facility listings.
- **Integrated** the Google Places API to dynamically fetch, update, and persist precise location-based data.
- **Optimized** data rendering by building responsive, filterable data tables mapped directly to custom REST API endpoints.

EDUCATION

UCSD Extension - San Diego Workforce	2025 – 2026
<i>Frontend Development Certificate</i>	
• Focused on frontend architecture, state management, and MERN stack deployment.	
Free Code Camp	2025
<i>JavaScript Algorithms and Data Structures</i>	
• Solved 300+ hours of algorithmic logic and data structure challenges.	
San Diego Mesa College	2019 – 2022
<i>Coursework in Web Development (AS Program)</i>	
• Completed core curriculum in web fundamentals, object-oriented JavaScript, and modern frameworks.	
UCSD Extension - TrilogyED	2019

Full Stack Development Bootcamp

- Rigorous, project-based program covering the MERN stack and database integration.

CERTIFICATIONS

Google UX Design Professional Certificate

2026

- End-to-end training covering UX research, wireframing, high-fidelity Figma prototyping, and usability testing.
